

## G2. DOUGH SHEETER

### VA 650

VA 650 is used for sheeting various dough types. VA 650 R has also a dough cutting device and because of that also a two-speed motor.

#### Advantages:

- The belts which are moved to the left and to the right during the working cycle can be switched on by hand.
- The distance between the rollers is very precise and it can be manually or step wisely adjusted.
- The flour for dredging the dough during the working cycle is stored in an easily removable vessel.
- The machine is provided with a safety mesh, which switches the machine off in case of approaching with hands.
- Machine's cleaning is quick and simple.
- When the machine is not in operation, the working tables can be lifted in order to use less space.

#### Technical and technological characteristics:

MACHINE	VA 650/1400	VA 650 R/1400
Distance between rollers (mm)	0 - 50	0 - 50
Belt width (mm)	650	650
Belt speed (cm/s)	60	60 - 20
Installed power (kW)	1,1	1,5
<b>Dimensions</b>		
machine dimensions (mm)	3317x1108x1168	3317x1108x1168
working table length (mm)	1400 + 1400	1400 + 1400
dimensions of packed machine (mm)	1110x1170x1790	1110x1170x1790
machine weight (kg)	260	290
gross weight (kg)	290	320

#### Basic version of machine VA 650 R includes:

- painted framework
- one-speed of the table
- flour dredger

#### Basic version of machine VA 650 R includes:

- painted framework
- two-speeds of the table
- flour dredger
- cutting device with one cylinder

#### Option:

- additional cylinder for cutting
