GOSTOL-GOPAN D.O.O. APPOINTED A NEW MANAGER

We have received news from the company Gostol-Gopan about appointment of a new Manager. This position has been taken for the period of four years by the previous Sales Manager, Mr. Dejan Božič, Bachelor of Science in Economics, from Šempas nearby Nova Gorica. He has entered this position today, on 1 August.

Mr. Dejan Božič started his career at the company Gostol-Gopan five years ago – at first as the Head of Field Sales for the markets of South-Eastern Asia, Southern Europe and America and after a year he took over the Management of Sales Department. Through these years he has gained important experience from the market field and he has learnt a lot about demands and wishes of increasingly demanding clients. As a young Manager, he is extremely inclined to novelties and changes from the market which could improve the company's business operation. Being a very dynamic person in the capacity of Sales Manager, he has travelled throughout the world several times per month. He has good organisational and negotiating capabilities, extraordinary intuition for potential business deals and last but not the least, he fluently speaks several languages. A new workplace is a great challenge for him, which he has already started to cope with. He is convinced that he will be successful in realizing the set goals during his term of office.

Similarly, other representatives of the company Management believe that a new and fresh wind will take the company further on the path, already up to now successful. The company has been present on the market now for 60 years which proves that it has been more or less on the right track. Finally, the new Manager will try to introduce novelties and changes so that the company's successful tradition will continue to go on.
